## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 286-288, 296-312, drawn to a resonator structure for MRI and driving circuit and corresponding method.

Group II, claim(s) 289-295, drawn to a method for designing a resonator for MRI.

Group III, claim(s) 313-347, drawn to a resonator structure for MRI.

2. The inventions listed as Groups I, II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I and II are related as combination subcombination. The subcombination does not require the particular electronic circuit of the combination. That is, the subcombination is not essential to the combination. The resonator does not need include the additional conductive element. Groups I/III and II are related as product and method of making. In this case the resonator can be made by another method that does not require iteration of the geometric calculations.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
